Git

=====

<https://try.github.io/>

<https://hugogiraudel.com/2018/02/17/how-i-use-git/>

\$ git config --global user.name "*Mona Lisa*"

\$ git config --global user.name (check your username)

\$ git stash save "Mon Message pour identifier ma sauvegarde"

\$ git stash pop (récupère mon dernier stash)

git stash list

git stash apply "Mon message"

annuler le add => git reset HEAD . (le point suffit, si un seul fichier ou le nom du fichier si plusieurs fichiers)

git branch nom-de-la-branche

git checkout nom-de-la-branche

git add -u README.md

git commit -m "Initialisation"

git fetch

git checkout main

git merge nom-de-la-branche

git push --set-upstream <https://github.com/Web-God/projet.git> master

git push origin
